Challenge

# Problem

## Covid-19

Total cases(Worldwide): **5,817,385**

Total cases(Bangladesh): **42 844**

There are about 170 million people in Bangladesh. Almost 100 million people use masks, gloves, hand sanitizer for their safety. After using these, where all these materials are going

Pollute the environment

This old man does not know what to do with used mask

His grandson called **"MR. Waste"** to utilize the waste and earn some money

1

Decentralized Server

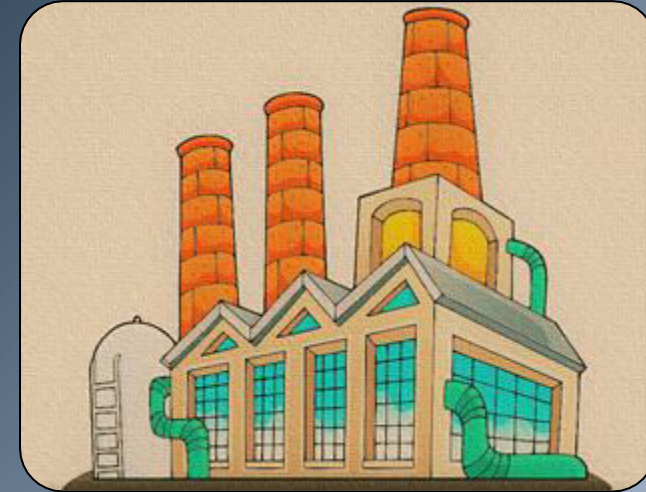

The lower income person

3

Get notification from the user and reach there to collect the waste

Waste Management Company

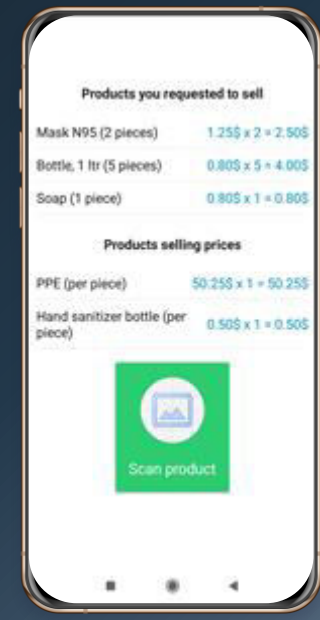

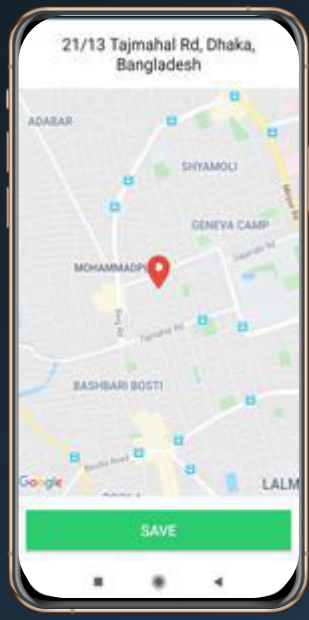

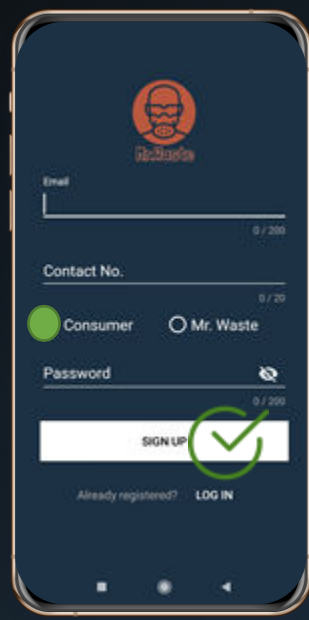

4

Getting all these, he goes to provide the waste to the waste management company and take the money for waste

How it works

If you are a

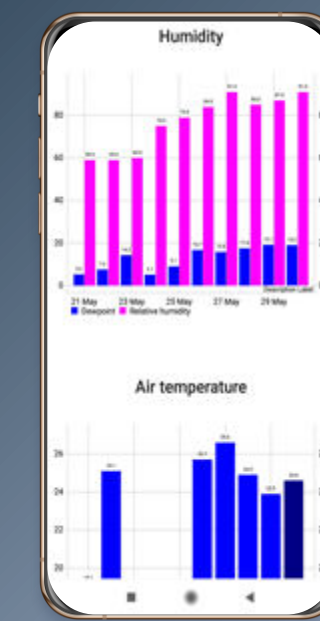

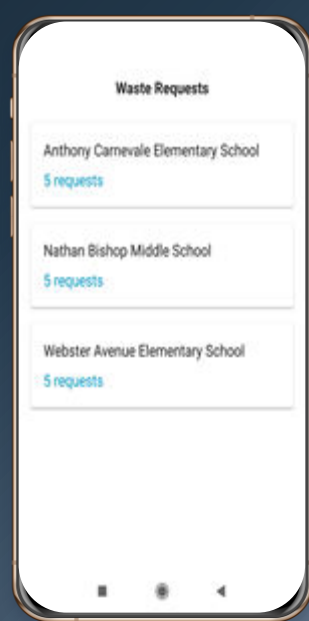

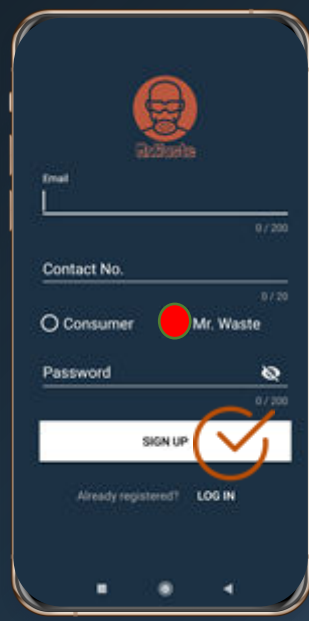

Using AR you can scan your product and

the app will show you the amount you can get. Here is the video

If you are

Mr. Waste will go that area after knowing the condition of that area with the help of Nasa's data
